The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by
Leuchtmann.

Figures 7,8 show structure as claimed, including a pivot tube 7a fixedly secured to support members 6 and including slots therein, a pivot rod 4a disposed within the tube 7a including guide pins 5 that extend through the slots, and helical springs 19 secured within the tube.

Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Haltenberger, Cramer, Denton, and Hoblingre show various features of the invention.
